

WIRELESS HEALTH 2015

The National Institutes of Health (NIH)

Bethesda, Maryland

October 14-16

The unique mission of the Wireless Health conference is to provide the highest quality academic, health and industrial research forum to develop an international community to accelerate the development and adoption of new wireless, mobile and connected technologies for improving health and lowering costs. Central to this mission is the creation of a nurturing research forum that creates an opportunity for trans-disciplinary and cross-sector collaboration. This unique meeting brings together members of the health and technology research communities, device manufacturers, health service providers, and federal policy makers. Wireless Health 2015 will offer an outstanding set of peer-reviewed papers and abstracts, interactive workshops and tutorials, emerging application demonstrations, and world-renowned keynote speakers.

We ask you to help support the costs of hosting the Wireless Health Conference at the NIH.

When: October 14-16, 2015

Where: National Institutes of Health in Bethesda, Maryland
